INSTALLATION PROCESS

EUROPRACTI

1. PREPARE & PLAN

- Smooth & Clean: Ensure a smooth, clean surface.
- Measure & Layout: Measure and plan panel arrangement.

3. APPLY ADHESIVE

- Suitable Adhesive: Use recommended construction adhesive (available on our website or upon request)
- Zigzag Application: Apply adhesive in a zigzag pattern.

2: CUTTING

- Circular Saw: Use a fine finish blade with a circular saw.
- Swift Cuts: Make quick cuts for a clean edge.

4. INSTALL

- First Panel: Press firmly, check alignment with a level.
- Overlap Panels: Ensure tight, seamless overlap.
- Secure Seams: Use clear adhesive on seams for a tight fit.
- Clean Up: Wipe away excess adhesive.

PRODUCT HANDLING & PRECAUTIONS

- The product is intended for interior uses only
- Avoid direct sunlight. The product could fade with prolonged exposure.
- It is recommended to keep the product at room temperature for 24/48 hours in the installation area to acclimatize
- The corners of the product are fragile and should be handled gently
- The panels are water resistant but prolonged exposure to moisture can harm the product.
- Clean the panels only with a soft damp cloth. Do not use any chemicals or cleaning agents as they can damage the panels.
